

Year 4 Home Learning Summer 1

Our Year 4 weekly home learning expectations are: -

Read your school reading book five times per week.

Develop your times tables fluency using Times Table Rockstars (this is crucial as we edge closer towards our Multiplication Tables Check).

Learn your spellings each week.

You are also expected to complete at least one of these projects which you will bring in to present to the class.

The deadline for these to be in school is Monday 20th May 2024.

Maths

Create a catchy poem or song or rap that will help children to learn roman numerals.

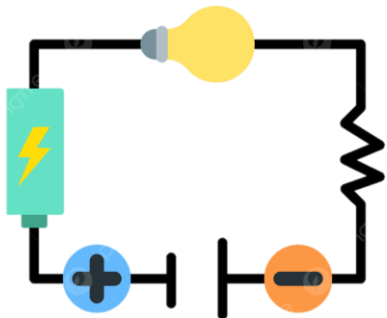

English

Can you write your own non-fiction text about a famous scientist that you are passionate about learning more about?

Science

Create a board game which will help to teach children the different symbols for electrical circuits. Be creative and have fun with it! Make sure you have rules and instructions.

Art

Our topic this half-term uses nature as our stimulus. Can you create your own piece of artwork using natural materials?
