

Year 5 Home Learning Autumn 2

Our Year 5 weekly home learning expectations are:-

Read your school reading book five times per week.

Develop your times tables fluency using Times Table Rockstars

Learn your spellings each week.

You are also expected to complete at least one of the projects below which you will bring in to present to the class.

The deadline for these to be in school is Monday 11th December 2023.

PE

Linking to our PE topic of dance, create your own dance in the style of your choice. Either:

- Record yourself dancing and have an adult email to the teacher.
- Or write out a step-by-step guide as to how to learn the dance.

Geography

Create an information leaflet all about a Country in Oceania. You could present this as a travel brochure.

Think about:

- How you can make it eye-catching to the reader.
- How you can layout your information clearly.
- How you can make it interactive for the reader.

Maths

Create a division game which involves your times tables. Think about how you could make it interactive for others and how it would support learning division facts.

Science

Linked to our topic of space and gravity, create a 3D solar system of the planets. Think about how accurately you can represent the size of each planet.
